Cut and glue to half of a 9-inch paper plate.

Fold and cut a second paper plate in two halves. Use one half for the bottom pocket of the ark. Cut the pattern and glue to the bottom pocket. Glue the pocket around the edges of the bottom of the paper plate leaving the center open, or even better, staple the pocket around the edges.

Another option: Print the bottom on card stock, cut and staple for the pocket.

Kid Colored: Have the child paint or color the bottom pocket half of the paper plate. (Use the black and white version of the top part of the ark. Cut, color and glue to the plate.)

Cut out the animals and glue to small or mini craft sticks and use with your ark.
