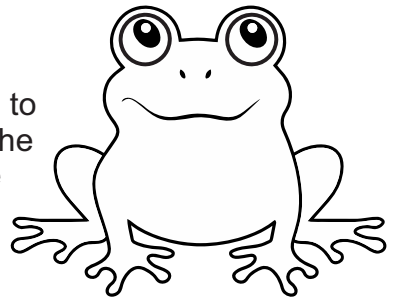
Leap Year Nonograms



The numbers at the top of the columns tell you how many spaces to fill in that vertical column. The numbers to the left of the rows tell you how many spaces to fill in the horizontal rows. For example, the numbers 1 1 in the first column tells you that there is 1 space to fill in and then there are some spaces before filling in one more space. The numbers 6 2 at the left of the first row tells you that there are 6 spaces to be filled in together, some blank spaces, and then there are 2 more places to be filled.
